Germany/Switzerland – Spalt/Pfäffikon 05/11/2021 – The FATH Group with headquarters in Spalt has also been represented in Switzerland since 01/10/2021. "The market entry into Switzerland and Liechtenstein is a sign of our continuous growth. "We are well prepared for the demanding Swiss market and its challenges thanks to our company history of more than 30 years and our global positioning," says Wido FATH, CEO and founder of **FATH**.

With sites in Germany, the USA, the PR China, Hungary, the United Kingdom, Mexico, Brazil and the Netherlands, the Group already has a strong market presence far beyond Europe. Since its repositioning in 2021, **FATH** identifies as a global innovation driver for intelligent system solutions in the production environment.

FATH is kicking off in Switzerland with an experienced expert. As sales manager, Mr Uwe Thomas Lieber, who has held management positions at Würth Industrie Service GmbH & Co. KG, will guide the newly founded **FATH** Schweiz AG on the road to success.

FATH offers useful, innovative component and system solutions for shop floor and intralogistics that work seamlessly together – SOLUTIONS FOR INDUSTRIAL ECOSYSTEMS. Customers achieve excellent value creation in the industrial environment through highly efficient production and logistics.

In addition to mechanical components and industrial fitting parts, **FATH LEAN 4.0** is a key focus. Intelligent products and solutions are available for lean production to streamline work processes. The portfolio is supplemented by useful digitalization and automation solutions that optimize production at the interface between humans, machines and materials. **FATH** provides a wide range of products in its own name as well as from **FATH** brands such as ambos.io and **FATH** Mechatronics.

"We support our customers with simple and easy-to-implement solutions to increase their productivity and at the same time enrich the working experience of employees," says Wido Fath. From now on, customers in Switzerland and Liechtenstein can also benefit from the know-how, expertise and innovative power.
